

Installs up to three times faster in very cold weather.

AEROCEL[®] SSPT

When it's below freezing or below 0°, you need flexible insulation. Not rubber that cracks and breaks apart. Insist on Aerocel[®] SSPT with an exclusive EPDM formulation that bends without cracking. With Aerocel[®] SSPT you save time and money, and you cut your labor costs at least 60%.

Here's why AEROCEL[®] is your #1 choice:

- Aerocel[®] SSPT's unique dual-direction, extreme conditions closure system insures positive longitudinal seam closure in the coldest conditions.
IT KEEPS YOUR CREWS WORKING.
- Aerocel[®] SSPT is on, the job is done. Aerocel[®] SSPT provides real UV resistance - no coating or jacketing is necessary.
- Aerocel[®] SSPT insulates larger OD pipes easily, lowers sheet installation and reduces nesting. Available to 2" wall through 6" IPS, still 25/50 flame and smoke rated.
- Aerocel[®] SSPT is made in USA. Quality guaranteed.
