

 Thermal Ceramics

FIREMASTER

Duct Fire
Protection Systems

**The Original,
The Leader,
and still
The Best!**

Thermal Ceramics was the first to develop the flexible duct enclosures called FireMaster Duct Systems for commercial kitchen grease and air ventilation ducts. Today, after more than 13 years, FireMaster is still the market leader with the most fire tests and approvals of any duct system and a vast number of field installations worldwide.

- Non-combustible 2000°F - 2300°F passive fire protection does not shrink during fire conditions
- Proven performance testing beyond laboratory listing requirements meets the challenge of special jobsite needs
- Meets NFPA 96 (Section 4.3.1) ASTM E2336 for grease duct enclosure systems
